

DYNAMIC CONTROLS

Who is Dynamic Controls?

Dynamic Controls was established in 1972, specialising in the design and manufacture of speed controls for industrial forklifts and personnel carriers before moving into powered wheelchair controllers. Now, this Kiwi-spirited supplier has firmly established itself as a world leader in the specialised niche market of controllers for power wheelchairs and mobility scooters. Dynamic is also one of the largest sub-contract manufacturers in Australasia. Manufacturing capabilities are world-class and supported by 'best practice' quality systems.

What does Dynamic Controls do?

Dynamic Controls is the preferred supplier of control systems to the world's leading manufacturers of power wheelchairs and mobility scooters. The company's products range from low-cost integral controllers for power wheelchairs to a world-leading modular wheelchair control system offering a wide range of modules, allowing users to build a wheelchair system of any functionality and complexity, module by module, in a cost effective and future proofed way. Dynamic Controls also produce a range of scooter controllers suitable for small, lightweight mini shoppers through to rugged outdoor scooters, as well as accessories. A key focus for Dynamic is technical innovation for product performance, quality and cost effectiveness.
