

HUMANWARE

Who is HumanWare?

HumanWare is a company that focuses on using technology to help improve the lives of people with disabilities. This is a truly a global company. HumanWare's marketing, production and R&D operations are based in New Zealand and Canada, the company has established sales offices in the United States, the United Kingdom, Europe and Australia, as well as distribution networks throughout North America, Asia, the Middle East, Europe and Australasia.

What does HumanWare do?

HumanWare provides intuitive, intelligent solutions that enable people with disabilities to participate effectively in today's technology savvy society. HumanWare's primary focus is on improving the lives of blind and visually impaired people. For these people, HumanWare has created the BrailleNote, an information access device with refreshable Braille technology, myReader – the world's first low vision auto-reader, the SmartView desktop video magnifier and the portable PocketViewer magnifier.

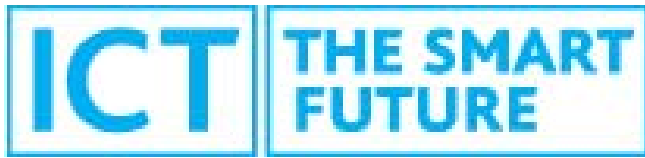

HumanWare's also developed a range of digital talking books, personal information management systems and ScannaR, a flat-bed scanner that will scan any text document and read it back to you in seconds. And, HumanWare also produces the world's only commercialised GPS based orientation solutions for the blind.

What kind of ICT roles are at HumanWare?

HumanWare employ people who are committed to excellence – top performers, individuals prepared to go that extra distance, including Hardware Design Engineers, Verification Engineers, Technical Authors, and Project Leaders.

Does HumanWare offer work experience/graduate opportunities?

When it comes to offering students and graduates the opportunity to get involved in the ICT industry, HumanWare is extremely supportive. They're always keen to give students work experience, and in suitable circumstances, will offer graduates positions within the

company. For more information about this, contact Narelle Burke:
